– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 January 2006.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

1. Amendment filed on 1/9/06 has been received.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Flower et al (2002/0185348) in view of Jankovsky (U. S. Patent no. 4,442,870).

Flower et al discloses:

See figures 1-4 casing, sliding (first moving member 34, second moving member 48 with damping portion 58A), conversion mechanism (inclined faces 54, 66)

Flower et al does not disclose a tapered damping groove. Jankovsky teaches the use of a tapered damping groove (see figure 6 surfaces 21-24,31-34) in order to increase brake surface area. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the tapered damping groove as taught by Jankovsky in the device of Flower et al in order to increase braking surface which increase the damping force available.

Response to Arguments

4. Applicant's arguments filed 1/9/06 have been fully considered but they are not persuasive. Applicants argue that the inclined surfaces of Jankovsky decrease the brake surface area. The examiner is unclear how that is the case. The inclined faces increases the brake surface area. Column 3 lines 44-47 indicates that the brake force increases between the receiving member 38 and the brake shoe 35 with the inclined surfaces. The movement of 35 is decreased because the brake force increased not decreased.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
